

Task#3 :

1. Open this link <https://demo.productionready.io/#/> and find the best selector for it. You can use any type of selectors that you know , but please try to use all of them .
2. Create a spec file called task3 .
3. Use the same repository you created it before "yourname-qa-tasks"
Just push the new file task3 to the repo. With a clear commit like "Solution for task3" .
4. Please find all selectors for all elements rounded by red rectangles or the red arrows .

Here just click on Sign In link in home page , or visit the page directly <https://demo.productionready.io/#/login>
